ILLUSTRATIVE CONCEPTS - NOT COMPLETED CLIENT WORK

Delivery fleets / Shop owners / Sign fabricators / Agencies / Manufacturers

Vehicle & fleet wraps

One-way vision film*

Outdoor sign-face prints

Kiosk & panel wraps

Direction & distance faces*

Fabric display prints*

* Suitable media and any required accessories are checked first. Road faces need the specified system and project acceptance.

Materials and written warranty terms: see page 5.

The materials. The process. The written promise.

Choose a print for its setting, then specify the complete construction. Materials, proofs and written terms are confirmed before production.

The printer

HP Latex 730 is a roll-to-roll printer. The standard model has no white ink.

The ink

HP 832-series is the OEM ink family listed for HP Latex 730 in 3M's August 2026 list. It is HP ink, not '3M ink'.

The finish

For jobs requiring 3M materials, film and protective laminate/overlay codes and availability are confirmed in writing. Match the construction to exposure and installation.

Your proposed job specification

Your specification records film code, OEM ink, protective laminate or overlay, profile, approved proof, surface and location, finishing and fitting. Current material codes, RIP, certification and coverage await confirmation. Exact product codes and any warranty terms: confirmed in your written quotation.

Manufacturer cover is specific

3M MCS coverage may apply only to an eligible complete construction, with a valid printer/ink certificate, the current matrix and local terms. The separate 3M Performance Warranty excludes ink defects; this catalogue does not present HP 730 as covered by that programme.

Care at every stage

3M testing of a listed system does not mean 3M inspects each SurfaceWorks print. Our workflow is material review, artwork and colour-proof approval, then print and finish checks.

Road sign faces

Traffic signs follow separate sign-face rules and local project acceptance. Written 3M India confirmation is needed before any manufacturer warranty is offered. Hardware, fabrication and installation are separately scoped.

Any manufacturer warranty offered will be identified in your written quotation for the exact materials, application and location. This catalogue does not itself issue or extend a 3M warranty.
